SUMMARY

B.Tech Information Technology graduate (2026) with hands-on experience building LLM-powered applications using Python, Generative AI, and Retrieval-Augmented Generation (RAG). Skilled in prompt engineering, embedding-based semantic search, and vector retrieval using LangChain, FAISS, and Google Gemini. Strong foundation in Python-based ML workflows — preprocessing, feature engineering, model development, and evaluation — using Scikit-learn, Pandas, and NumPy, with additional experience in Power BI dashboarding, SQL, and version control with Git/GitHub.

SKILLS

Generative AI / LLM: LLM-based Applications, Generative AI, RAG, LangChain, FAISS Vector Search, Vector Embeddings, Hugging Face Embeddings, Google Gemini, Prompt Engineering

Programming: Python, SQL, HTML, CSS

Machine Learning / DL: Scikit-learn, TensorFlow, Classification, Regression, Clustering, Feature Engineering, Model Evaluation, Hyperparameter Tuning

NLP: spaCy, TextBlob, TF-IDF

Data Analysis: EDA, Statistical Analysis, Data Cleaning, Pandas, NumPy, Matplotlib, Seaborn

BI & Tools: Power BI, DAX, Power Query, Data Modeling, Tableau, MS Excel, Figma, OpenCV

Version Control: Git, GitHub

EXPERIENCE

AI/ML & Data Science Training Program – PySpiders (Offline)

Jan 2026 – Aug 2026

- Completed an intensive, mentor-led program covering SQL, Python, Power BI, Excel, statistics, ML, and Generative AI through structured assignments and mini-projects.
- Applied statistical modeling, EDA, ML techniques, and Generative AI workflows across data analysis, model development, and evaluation tasks.

Data Analytics, AI & ML Intern – Novi Tech

Jun 2025 – Aug 2025

- Collected, cleaned, and preprocessed real-world datasets using Python and Pandas; performed EDA to prepare structured inputs for ML workflows.
- Trained and evaluated ML models using Scikit-learn, analyzing accuracy and performance metrics to support iterative model development.

Power BI Intern – Novi Tech

Sep 2025

- Built interactive Power BI dashboards using DAX and data modeling to translate business data into actionable stakeholder insights.

PROJECTS

ResumeLens AI – AI Resume ATS Analyzer | Python, Streamlit, LangChain, Gemini, FAISS, Hugging Face, spaCy

- Built a Generative AI application that analyzes resume-to-job-description alignment and generates an ATS score with matched skills, missing skills, and improvement suggestions.
- Designed an NLP and semantic retrieval pipeline using spaCy, Sentence Transformers, and FAISS vector search to retrieve job-relevant resume content via RAG-style retrieval.
- Integrated Google Gemini via LangChain for structured resume analysis; built an interactive Streamlit interface for PDF upload and result visualization.

Insurance Fraud Triage Engine | Python, Pandas, Scikit-learn, Imbalanced-learn, Optuna

- Developed an end-to-end ML classification pipeline in Python to flag fraudulent insurance claims and prioritize high-risk cases.
- Built leakage-resistant preprocessing using ColumnTransformer and Scikit-learn pipelines covering imputation, encoding, and scaling.
- Addressed class imbalance via resampling, benchmarked models on precision/recall/F1, and applied Optuna tuning to improve fraud-class recall.

Financial Loan Analytics Dashboard | Power BI, Power Query, DAX

- Built a 3-page interactive Power BI dashboard (Executive Summary, Loan Performance, Risk Analysis) from a Kaggle dataset of 38,576 records across 24 columns.
- Designed a star schema with Date, Borrower, and Geography dimensions; created 22 DAX measures covering loan volume, funded amounts, and Good/Bad Loan trends.

EDUCATION

B.Tech in Information Technology – Arunachala College of Engineering for Women, Anna University (CGPA: 8.73) | 2022 – 2026

Higher Secondary – Little Flower Girls Higher Secondary School (86.5%) | 2020 – 2022

CERTIFICATIONS

- Foundations: Data, Data, Everywhere – Google (Coursera), Sep 2025
- Getting Started with Microsoft Excel – Coursera Project Network, Aug 2025
- Contributed to Hackathon – St. Xavier's College of Engineering and Technology, Apr 2025
- Participated in Alo Gan Hackathon – ALO Info Tech Company, Apr 2025
